Front Projection (Normal Screen)

CRT White Screen - apply both a CRT White Basecoat followed by a CRT White Topcoat.

Digital Grey Lite Screen - apply both a Digital Grey Lite Basecoat followed by a Digital Grey Lite Topcoat.

Digital Grey Screen - apply both a Digital Grey Basecoat followed by a Digital Grey Topcoat.

Ultra Grey Screen - apply both a Digital Grey Basecoat followed by an Ultra Grey Topcoat.

Screen Goo Kit

Create up to 140" diagonal 2.35:1 screen, 130" diagonal 16:9 screen or 120" diagonal 4:3 screen . Kits include 1000mL each Top and Base coats, 250mL Ultra Black border paint, 4L Paint Tray, Roller Handle with 2 premium Roller Refills, a 2" Foam Applicator, 32"x2" Flock tape, 60"x2" Painter's tape and complete instructions (Thai version manual is available for download).

Front Projection (3D Application)

Ultra Silver/3D Screen - apply (Spray Only) a Digital Grey Basecoat and an Ultra Silver/3D Topcoat.

Rear Projection

Rear Projection Screen - only apply (Spray Only) a Rear Projection Topcoat. No Basecoat required.

Ultra Black Border

Create non-reflective black border for your screen with Screen Goo Ultra Black Border. Help absorb any overlapping light from your projector. To apply Ultra Black Border, use paint brush or small paint roller.

Flow Release

Price(฿) - 60 mL	500
------------------	-----

A surface-active liquid which reduces surface tension, thus improving wetting and increasing the flow of acrylic waterborne paints. Help slow down drying process. Always use when sprays the Goo or rolls very large screen.

Coverage Area

Topcoat and Basecoat coverage per sq. meter can vary somewhat, depending on the surface conditions. With rolling method, 1 liter will typically cover approximately 4.65 sq. meter. with two thin coats, under ideal conditions on an ideal non-absorptive surface. Starting with a primed white surface is strongly recommended for peak performance. With spraying method, coverage area reduces to 3.72 sq. meter under the same condition as above.

Screen Goo Rolling Service

Price(฿)/Sq.meter : 4,100 + Service Fee

- **Rolling is performed by professional in-house painter with extensive experience on Screen Goo painting.**
- Rolling Service is available for CRT White, Digital Grey Lite, Digital Grey and Ultra Grey Screen Goo.
- Basecoat and Topcoat are rolled 2 layers each.
- Service doesnot included prep-work of pre-paint surface. The pre-paint surface must be prepared (i.e. smoothen, leveled) and applied at least 2 layers of water-base white primer.
- Service does not included black border (available upon request with extra charge).
- Minimum 5 Sq.meter of painting area.
- Service Fee varies depend on site location, working hour, height of painting area, complication of the job, etc. Starting from Baht 5,000 per day.
